<h3>Action by</h3>	
<p>All staff who may use or handle this device, particularly supplies and paediatric departments.</p>	
<h3>CAS deadlines</h3>	<h3>Contact</h3>
<p>Action underway: 30 July 2012</p> <p>Action complete: 13 August 2012</p> <p>Note: These deadlines are for devices to be identified and disposed of.</p>	<p>No contact available</p>

Device

This device assists in securing an endotracheal tube (ETT) in position for neonatal and paediatric patients.

Problem

The composition of the plastic used to make the clamp/holder was changed to a DEHP-free material. This affected the physical properties of these components, resulting in an increased risk of slippage or tube obstruction.

EMS Medical went into administration before this issue was identified and it is not known how many affected devices have been supplied.

Distribution

This MDA has been sent to:

- NHS trusts in England (Chief Executives)
- HSC trusts in Northern Ireland (Chief Executives)
- NHS boards in Scotland (Equipment Co-ordinators)
